

KC2200 Series

EMC Circular Backshell with braid trap nut termination for overall and individual wire screening

- Lightweight and compact backshell suitable for all standard circular connectors
- High levels of EMC and environmental performance
- Overall screening is provided by braid trap nut
- Individual screening with slotted body and interwoven braid
- No special tools are required and the system is easily reworked
- Teeth on backshell body mesh with connector teeth for positive lock
- Blind teeth for increased EMC screening with internal taper for enhanced environmental sealing with the connector
- Additional environmental sealing of cable system by heat shrink boot to provide environmental seal that is equal to or higher than the IP rating of the connector
- Cable clamp options also available

TABLE 6	
CLAMP OPTIONS	
C	WITH CLAMP BARS
N	WITHOUT CLAMP BARS

NOTES:

- WORKING LENGTH IN 12.7mm (0.5in) INCREMENTS. FOR EXAMPLE WORKING LENGTH 4 = 50.8mm (2in). MINIMUM WORKING LENGTH FOR KC2200 SERIES IS 2. (STRAIGHT BACKSHELLS ONLY - OMIT ON ANGLED VERSIONS)
- USE 22/26/28/32/38 FOR STRAIGHT BACKSHELLS, 42/46/48/52/58 FOR 45° BACKSHELLS & 82/86/88/92/98 FOR 90° BACKSHELLS
- THE ABOVE INFORMATION IS TYPICAL AND MANY OTHER OPTIONS & VARIATIONS ARE AVAILABLE, PLEASE CONSULT FACTORY
- USED FOR MODIFICATION TO STANDARD PARTS. CONSULT FACTORY FOR OPTONS
